

Strong antioxidant activity combined with ECM protection

Ellagicin[®]

helps prevent damage caused by environmental and proteolytic induced stress

Açai and Pomegranate Super-Fruit Extract

Ellagicin[®] is a botanically derived active produced from acai and pomegranate “superfruits” submitted to a proprietary extraction technique. Rich in active anthocyanins, flavonoids, and polyphenols, Ellagicin provides strong antioxidant activity against environmental stress, coupled with protection of the extracellular matrix via inhibition of proteolytic stress, including elastase and collagenases.

Ellagicin[®]

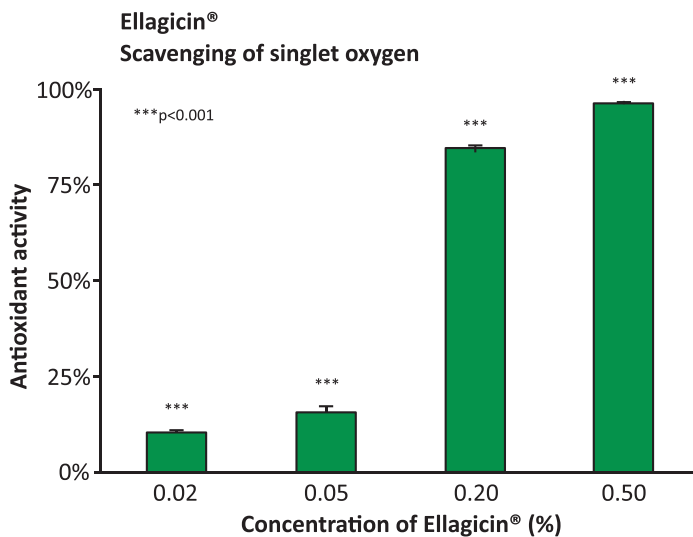

Product ID – R10068

Suggested Use Level – 0.5%-3%

Water (and) Euterpe Oleracea Fruit Extract (and) Punica Granatum Fruit Extract (and) Glycerin

Applications

- Anti-aging regimens protecting against oxidative and proteolytic stress (UV exposure, pollution, etc.)
- Soothing and calming for sensitive skin
- Pre- and post-sun skincare
- Skin brightening and skin tone balancing systems
- Post-shave lotions and gels to relieve irritation

Ellagicin[®] offers protection against oxidative stress, dose-dependently combatting singlet oxygen activity.

Ellagicin[®] preserves youthful skin structure, protecting the extracellular matrix from the damaging activity of elastase in a dose-dependent fashion.
